- 13. (Canceled)
- 14. (presently amended) A data cable having a plurality of twisted pair conductors, a cable covering, and an interior support comprising:said interior support having:

a longitudinally extending central portion forming a portion of said support; a plurality of projections extending from said central portion; each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections; an open area defined by each of said plurality of adjacent projections and each open area has a volume equal to

or greater than a volume of at least one projection adjacent to each open area; said cable covering contacting a top end of each projection to define a plurality of at least four conductor compartments;

conductors disposed in each conductor compartment; and
each twisted pair conductor having a first insulated electrical conductor and a
second insulated electrical conductor, said first and second insulated conductors
twisted about each other to form a twisted pair open area.

only one twisted pair conductor from said plurality of twisted pair

- 15. (Canceled)
- 16. (Previously presented) The cable of claim 14 wherein each of said projections is a projection selected from a group consisting of a prong, a spline, and an arm.
- 17. (Previously presented) The cable of claim 14 wherein said open area is an open area selected from a group consisting of a channel, a groove, a duct, and a passage.
- 18. (Canceled)
- 19. (Canceled)
- 20. (Canceled)
- 21. (Canceled)
- 22. (Canceled)
- 23. (Canceled)
- 24. (Canceled)
- 25. (Previously presented) The data cable of claim 14 wherein the cable covering is

only a jacket, the interior support is an unshielded plastic support, and the twisted pair conductors are unshielded twisted pair conductors.

26. (Canceled)
